June 1, 2023

Dear Neighbor:

The wastewater treatment plant located on Herbison Rd was constructed between 1975 and 1980. Since then, only one major upgrade was done in 2006, adding new digesters and solids storage. The plant has long outlived all expectations for many of the processes.

In 2021, the Authority Board began discussing the upgrades needed for the plant. SCCMUA hired Moore and Bruggink to do a study, and several areas were designated for upgrades. In 2022, Moore and Bruggink began work on the design for the project, and staff applied for a State Revolving Fund (SRF) loan. The project went out to bid at the end of 2022, and the project was awarded to RK Davis Construction after finalization of the SRF loan. A preconstruction meeting was held in May. Currently, work is expected to begin in July and will last through 2025. The entire project duration is scheduled for July 2023 to December 2025.

Upgrades to the plant will involve work on the secondary clarifiers, the headworks, disinfection, tertiary filters, and many electrical components.

As with most construction projects, there will be traffic, noise, dust, and disruptions. We will do our best to keep this minimized as much as possible, but we ask that you are patient while we work through this project. The end project will be a huge benefit to everyone.

We will do our best to post updates on our Facebook page (www.facebook.com/sccmua) and our website (www.sccmua.com) including construction photos.

If you have any questions or concerns, please feel free to reach out to Brad Gurski, Director of Operations, at 517-669-8311 between the hours of 8 am – 3:30 pm.

Again, thank you for your patience.

Brad Gurski, Director of Operations
